

SyntheSys DOORS® Next Generation

QuickStart

SyntheSys DOORS® Next Generation QuickStart

SyntheSys QuickStart IBM® for DOORS® Next Generation focuses on the rapid adoption of DOORS® Next Generation family of requirements definition and management software solutions. Based on best practices, this service helps you achieve your communication, collaboration, compliance and verification objectives.

Activities

The DOORS® Next Generation QuickStart **accelerates the deployment of DOORS® Next Generation.** This service **reduces the time to self-sufficiency with DOORS® Next Generation by** creating a repeatable model for future projects, delivering an architecture that is ready for immediate use – one that supports your project life cycle.

As part of this service, **SyntheSys** QuickStart staff will deliver a documented and configured architecture that your project team can use immediately, with documented procedures for using and maintaining the defined architecture. Training and mentoring includes:

- Training on the newly defined architecture
- Initiates migration from DOORS® to DOORS® Next Generation
- Defining processes and procedures that support the project life cycle
- Overview of built-in reporting capabilities

Using QuickStart to help you implement your DOORS® Next Generation tools can help benefit your entire organisation. By setting up your project correctly with a combination of training and mentoring, you can leverage SyntheSys experience successfully deploying DOORS® Next Generation in a variety of environments. In addition, the service will provide a model and template that can be used as a foundation for definable and repeatable future projects across your organisation. You can minimise the effort needed by your organisation to successfully deploy a DOORS® Next Generation solution, implementing your DOORS® Next Generation tools quickly for the most moderate impact on your organisation.

Why use the SyntheSys QuickStart Team?

- We have the **most in-depth and up-to-date** IBM® DOORS® Next Generation skills
- **We are experienced** in deploying IBM® DOORS® Next Generation
- We have experience in **successfully delivering every stage of the systems engineering** project life cycle from installation, training and final roll out
- Highly skilled consultants **provide insight regarding best practices** (both from a solution design and requirements management standpoint)
- As an IBM® Partner, **we provide technical product information** and access to the development teams to support our projects

Service Overview

Accelerates the deployment of DOORS® Next Generation

Facilitates migration from IBM® DOORS® to DOORS® Next Generation
